^{*} Disclaimer concerning the proper use of business results forecasts

The numerical forecasts above have been calculated on the basis of currently available data and may differ from actual results.

1. Results of Operations

(1) Analysis of Results of Operations

(a) Results of Operations

During the fiscal year under review, the sub-prime loan problem in the U.S. had an obvious impact on the Japanese economy, and at the beginning of the calendar year, the effects of further increases in the price of crude oil and raw materials and rapid changes in currency exchange rates also came into play. As a result, there was conspicuous caution in capital investment.

In response to these economic conditions, the Toyo Denki Group worked to expand its operations and increase its corporate value through the execution of its medium-term management plan, the Innovation 90 Plan. Performance during the fiscal year under review was as follows.

- Although orders received in the Industrial Systems segment declined, solid performance in the Transportation Business segment resulted in 3.3% growth in total orders, to 38,873 million yen.
- Net sales in the Information Systems segment contracted, but the strength of the Transportation Business segment generated a 4.3% expansion in total net sales, to 38,130 million yen.
- The Group sought to enhance manufacturing efficiency through TSS (manufacturing reform) activities. However, there was a series of projects with a high proportion of new design and development, such as the Shinkansen projects, overseas projects, and environmentally friendly products employing batteries in the Transportation Business segment, and soaring raw materials prices caused manufacturing costs to increase. As a result, the gross profit margin fell, operating income dropped 27.9% to 1,391million yen, and ordinary income plunged 39.1% to 1,197 million yen. Toyo Denki and some of its consolidated subsidiaries changed from accounting for directors' retirement benefits as expenses at the time of expenditure to maintaining a reserve for directors' retirement benefits, which resulted in an extraordinary loss of 125 million yen equivalent to the sum needed to make up for the previous fiscal years. As a result of these factors, net income was 532 million yen.

Results by business segment are as follows.

Transportation Business Segment

Orders received from Japan Railways remained at a high level and those from other private-sector railway companies grew, while overseas performance was strong with the receipt of an order for electrical equipment for the Chengdu subway line number 1, which will be the first subway project in China' Sichuan Province. Accordingly, orders received in this segment rose 16.0% to 21,932 million yen. Strong domestic performance allowed net sales to rise 14.8% to 19,781 million yen.

Industrial Systems Segment

The restraint in corporate capital expenditure seen since the beginning of the year caused orders received in this segment to fall 12.4% to 14,623 million yen. Although sales of testing equipment for automotive development and processing equipment showed growth, net sales edged up 1.3% to 15,901 million yen.

Information Systems Segment

Sales of IC-compatible equipment for railway station operation systems were solid, allowing orders received to rise 12.4% to 2,318 million yen. However, the delivery of Suica and PASMO IC cards compatible equipment for the railway station operation systems in the Tokyo metropolitan area was completed in the previous fiscal year, and net sales decreased 33.0% to 2,447 million yen.

(b) Outlook for Next Fiscal Year

There are a number of unpredictable factors affecting the economic outlook, including the unusual conditions in the U.S. economy and the growing trend toward passing on steep rises in crude oil and raw materials prices to product prices.

There is a trend toward restraining capital expenditure among some of the Toyo Denki Group's customers, but the Group is moving forward with developing the technologies needed by the market.

Orders received are forecast to rise 13.2% to 44.0 billion yen, and net sales are expected to grow 4.9% to 40.0 billion yen. Operating income is forecast to rise 43.8% to 2.0 billion yen, as a result of rising sales, enhanced manufacturing efficiency, and a lull in projects with a high proportion of new design and development.

The Toyo Denki Group is making efforts to improve the earnings structure while striving to achieve the Innovation 90 Plan, expanding its operations and increasing corporate value.

The consolidated forecasts by business segment for the fiscal year ending May 2009 are as follows.

	Net sales	Operating income
Transportation Business	20,000 million yen	1,000 million yen
Industrial Systems	18,000 million yen	1,000 million yen
Information Systems	2,000 million yen	0 million yen
Consolidated total	40,000 million yen	2,000 million yen

Reference

The non-consolidated forecasts by business segment for the fiscal year ending May 2009 are as follows.

	Net sales	Operating income
Transportation Business	17,000 million yen	600 million yen
Industrial Systems	15,500 million yen	600 million yen

Information Systems	1,500 million yen	0 million yen
Non-consolidated total	34,000 million yen	1,200 million yen

(2) Fundamental Policy concerning Distribution of Surplus and Dividend for the Fiscal Year under Review and the Next Fiscal Year

The maintenance of stable dividends forms the basis of Toyo Denki's distribution of profit. The Company applies internal reserves to strengthen its financial position in addition to making strategic allocations to such areas as research and development, capital expenditure and overseas expansion, with the aims of growing its business and strengthening its management foundation in the future.

Dividends for the current fiscal year remained at six yen per share, unchanged from the previous term. The Company intends to maintain dividends at six yen per share or more from the fiscal year ending May 31, 2009 forward.

Toyo Denki will continue seeking to expand its operations and strengthen its management foundation as it strives to achieve a stable dividend.

(3) Analysis of Financial Position

The balance of consolidated cash and cash equivalents at the end of the fiscal year under review declined 575 million yen to 2,230 million yen year-on-year.

Net cash used by operating activities was 6 million yen. Factors included income before income taxes of 1,149 million yen, a decline of 789 million yen in inventories, and growth in notes and accounts receivable-trade of 2,128 million yen.

Net cash used by investing activities totaled 622 million yen, primarily for the acquisition of tangible fixed assets.

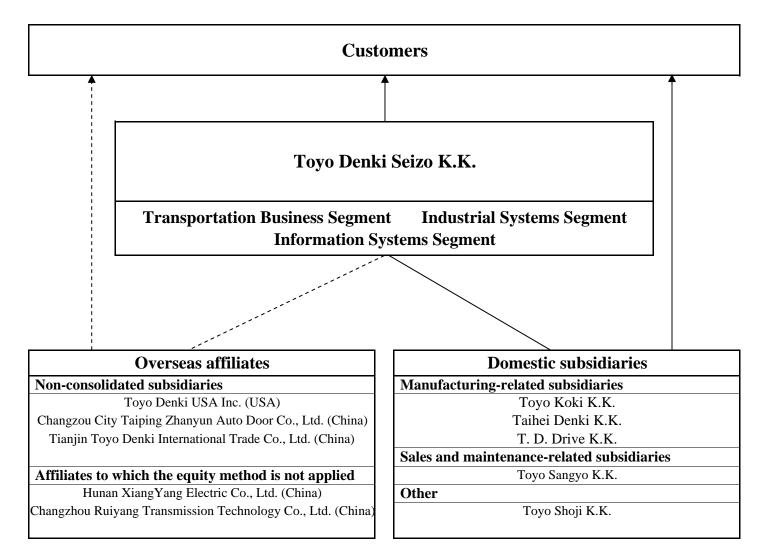

Net cash provided by financing activities was 52 million yen, primarily from long-term borrowings and the issue of corporate bonds despite such factors as the acquisition of treasury stock and the payment of dividends.

- Statements concerning financial results forecasts are based on data available as of the date of publication of this material and assumptions concerning the elements of uncertainty that will affect future business performance as of the date of publication of this material. Actual financial results may differ depending on a variety of factors.
- Forward-looking statements contained in this material are the judgements of the Toyo Denki Group based on data available at the time of publication of this material. Such statements and descriptions are by no means comprehensive.

2. Overview of the Group

The Toyo Denki Group is composed of Toyo Denki, eight subsidiaries and two affiliated companies. The Group is engaged in the manufacture and sale of electrical equipment for transportation, industrial and information systems as well as incidental projects.

The positioning and the organizational diagram of the Toyo Denki Group are shown below.

Note: Segments other than electrical equipment are not recorded individually as they have no significant effect on results.
