Financial Results Briefing
Fiscal 2015 (Ended May 2016)

July 13, 2016
Toyo Denki Seizo K.K.
Briefing on Financial Results: 25 minutes

1. Overview of Financial Results for Fiscal 2015
2. Outlook for Financial Results for Fiscal 2016
3. Medium-Term Management Plan “Next 100: Beyond the 100-Year Mark (Ver. 2)”

Q&A: 30 minutes
1. Overview of Financial Results for Fiscal 2015
   (June 1, 2015 – May 31, 2016)
1-1. Overview of Consolidated Financial Results

Net sales and operating income are slightly higher than last year. Ordinary income and net income are slightly lower than last year due to foreign currency transaction losses.

1-2. Factors Contributing to YoY Changes in Operating Income

Productivity transformation initiatives have been commenced in order to improve plant profitability as quickly as possible.

- Changes in gross margin: +¥130 million
- Changes in overhead expenses: +¥230 million
- Changes in plant profitability: -¥200 million
- Increase in profitability: +¥150 million
- Eliminations and other: -¥30 million

YoY change: +¥40 million

FY2014: ¥1,590 million

FY2015: ¥1,630 million
1-3. Details of Non-Operating Income and Expenses

Breakdown
- Loss on foreign currency exchange: -¥420 million
- Net interest and dividends: +¥110 million
- Equity in gain of equity-method investments: +¥80 million
- Other: +¥70 million

Non-operating loss: -¥140 million

Income tax, other: -¥610 million

Operating income: ¥1,630 million

Ordinary income: ¥1,490 million

Net income: ¥880 million

Note: Currency exchange rates
- End of May 2015: ¥123.73/ US$1.00
- End of May 2016: ¥110.94/ US$1.00
Orders received are improving both domestically and overseas. Net sales and income are slightly down from last year.

#### Assets
- Fixed Assets: Decrease due to fall in market price of investment securities (-¥2.9 billion)

#### Net Assets
- Increase in retained earnings (+¥0.6 billion) and decrease in accumulated other comprehensive income (-¥1.8 billion)
2. Outlook for Financial Results for Fiscal 2016
The forecast is ¥43 billion for net sales, ¥1.9 billion for operating income, and ¥1.8 billion for ordinary income.

- Target is ROE of 5% or greater
- Risk of foreign currency fluctuation is likely.

3. Medium-Term Management Plan “Next 100: Beyond the 100-Year Mark (Ver. 2)”
3-1. Medium-Term Management Plan—“Next 100”

“Next 100: Beyond the 100-Year Mark (Ver. 2)”

- **Business Environment**
  - Transportation Systems: China and ASEAN nations continue high investment in railway infrastructure. Japan continues to see an increase in domestic train demand due to upcoming Olympics and increasing inbound tourism.
  - Industrial Systems: Due to the uncertainty in the future of overseas economics, further decrease in capital investment demand is expected.

- **Group Actions**
  - Transportation Systems: Working on the reorganization of Yokohama Works, and initiatives such as strengthening production capacity and transforming productivity.
  - Industrial Systems: Working on improving production efficiency and expanding product portfolio by consolidating manufacturing functions at the new plant in Ryuo.

→ Two manufacturing bases: Yokohama Works & new Ryuo factory

May 2018 has been reset as the final year of the plan, with a focus on the following two points of the basic policy of Next 100:

- Build a stable business earnings structure
- Restructure production system
Reseting the final target and ending year to restart the “Next 100” midterm management plan as Version 2

**Period Covered (Ver.2)**
June 2016 to May 2018
(shifting the timing to our corporate centennial anniversary)

**Fundamental Policy**

- (I) Strengthen international competitiveness
- (II) Build a stable business earnings structure
- (III) Restructure production system
- (IV) Promote development of technology
- (V) Establish new businesses
- (VI) Train human resources to support global development

The fundamental policy of the Next 100 medium-term management plan started in June 2014 will be kept in place, with a deeper emphasis on the following two points:
- Build a stable business earnings structure
- Restructure production system
### 3-3. Medium-Term Management Plan—“Next 100”

Aiming to strengthen the management foundation as a 50 billion yen company under the slogan: “Beyond the 100-Year Mark”

**Performance Targets**

3-4. (I) Strengthening International Competitiveness
(Transportation Systems)

International Railway Projects

1. Orders to be received for upgrade of electrical equipment for electric towing locomotives for Panama Canal (about 100 train cars in volume)
   • Upgrade completion scheduled for 2019

2. Order for electrical equipment for expansion to Chengdu Metro Line 1 in China
   • 6 cars x 23 forms (138 cars)
   • Scheduled for delivery in Spring 2017

Electric towing locomotives for Panama Canal

Chengdu Metro Line 1
3-5. (I) Strengthening International Competitiveness
(Transportation Systems)

Commercialization of driving gear unit and pantographs incorporating Japanese engineering in European standard components

1. Development of driving gear units for high speed trains for European-specification trains used in Chinese railways
2. Prepare for increase in volume of standard China high speed trains
3. Introduction of our pantographs to the Beijing Subway
4. Order for our pantographs for Chengdu LRV

Driving gear unit (European specification)  Pantographs for Beijing Subway
3-6. (I) Strengthening International Competitiveness
(Industrial Systems)

Proposing industrial systems in Southeast Asia with power savings as the cornerstone

Delivery of dispersed power generation systems such as in-house power generation systems and small hydroelectric generation

- **Myanmar:** Biomass power generation
- **Thailand:** Water infrastructure, Machine tools
- **Malaysia:** Textile and film manufacturers
- **Indonesia:** Paper manufacturers
- **Pakistan:** Biomass power generation
- **Bangkok Representative Office**

(I) Strengthening International Competitiveness
Small hydroelectric generation

- Bountiful experience with power companies in Japan
- Higher efficiency by combining with permanent magnet synchronous motors
- Lineup with a wide range of power generation capacity from 10 to 750 kW
3-8. Business Development in Industrial Systems

Development to transform our current product lineup to meet our customer needs

1. Use of inverters (VF66 series) to power DC motors to standardize investment for equipment upgrades

2. Creation of series of power generators (5 to 20 MW) to meet the optimal market range for biomass and waste incineration power generation

3. Expand ED motor capacity zone

4. Deployment of new VF series inverter to comply with 690 VAC input

5. Creation of series of high-speed, low-inertia motors for automobile testing systems

6. Creation of series of distribution panels that meet customer needs

→ Realization of these through consolidation of our industrial plants

Progress as of May 2016

Site size: 33,400 m²

Land acquired by Toyo Denki
3-10. (III) Restructure Production System

Consolidation of our industrial plants for one-stop development, design, manufacturing and quality assurance

Our new factory will be able to support everything from development to quality assurance for a greater product lineup.

Factory floor space will be around 20,000 m² for 30% greater production capacity.

1. Lab for automobile development testing systems to speed up development
2. Improved efficiency by having the lines for motors, inverters and system boards all in the same factory
3-11. (III) Restructure Production System

Production capacity increase with the new Ryuo plant

1. New Ryuo plant in Shiga Prefecture for improved production ratio of high value added products
2. Improved efficiency of new product development by adding a development testing building onsite for automobile testing systems
3. Preparation to expand capacity of motors and inverters
4. Preparation for regular use generator testing environment

Lineup expansion of automobile testing systems

In-house production of controller boards
3-12. (III) Restructure Production System

Improving production capacity and efficiency of Yokohama Works

Yokohama Works will focus on becoming a transportation factory to improve production capacity by 30%.

Main products to be focused on for production capacity improvements

- VVVF Inverter
- Auxiliary power supply
- High-speed circuit breakers
- Driving gear units
- Train information systems
Order received for 50 commuter pass vending machines for the Transportation Bureau of the City of Yokohama (delivery end of March 2017)

Composite ticket vending machine that meets security authorization standards, compatible with future upgrade demands

- Compatible with a variety of tickets such as IC cards, magnetic PET tickets, large magnetic tickets cut from rolled paper, and Edmondson old style tickets.
- About 20% less power consumed when in standby mode compared to conventional units.
3-14. Development in New Business

Production of electrical components for Hitachi Construction Machinery’s ZH200 hybrid shovel

Hybrid system that achieves both high fuel efficiency and environment performance

Products we have delivered:
1. Electric swing motor
2. Power control unit (PCU)
3. Capacitor unit
4. Power generation assist motor
