Financial Results Briefing
Fiscal 2016 (Ended May 31, 2017)

July 13, 2017
Toyo Denki Seizo K.K.
Program

Briefing on Financial Results: 25 minutes

2. Consolidated Financial Forecast for Fiscal 2017
3. Current Status of the Medium-term Management Plan: “NEXT 100 : Beyond 100 years, Ver. 2”

Q&A: 30 minutes
(June 1, 2016 – May 31, 2017)
Both sales and profits were largely in line with previously announced forecasts.

### 1-1. Overview of Consolidated Financial Results

<table>

Net sales

Orders received: 433.5
Net sales: 406.6
1-2. Factors Contributing to YoY Changes in Operating Income

Non-consolidated operating income decreased YoY due to declines in gross margin and plant profitability, but operating income at subsidiaries increased YoY.

*Non-consolidated*

- Increase in profitability: +¥130 million
- Changes in gross margin: -¥140 million

*Consolidated*

- Increase in profitability: +¥190 million
- Changes in plant profitability: -¥150 million
- Changes in overhead expenses: -¥120 million
- Consolidation adjustment: +¥30 million

*FY2015*

- ¥1,630 million

*FY2016*

- YoY change: -¥60 million
- ¥1,570 million
1-3. Non-operating Profit and Loss

- Chinese high-speed railways are in a period of transition to standard-gauge trains.
- Orders received for domestic private railway projects increased significantly.
- Strong orders at subsidiaries (door operating equipment for buses in Japan) also contributed to the growth of segment income.
Trends of Orders Received for High-speed Railways in China

Period of transition to standard-gauge trains
1-5. Segment Performance: **Industrial Systems**

Segment income declined significantly due to the effects of adapting to design changes in testing equipment (in 1Q).

- **Net Sales and Segment Income**
  - Net sales: 116.1, 120.2, 110.7
  - Segment income: 8.4, 10.1, 7.4

- **Orders Received and Order Backlog** (100 million yen)
  - Orders received: 133.1, 114.2, 121.9
  - Order backlog: 66.3, 60.2, 71.5

- Design man-hours increased sharply due to the development of multi-function testing equipment in 1Q.
- Orders received recovered for processing machines and expanded for overseas projects (power generators).
Large-scale projects for station operating equipment contributed to sales increase and sharp segment income growth.

- **Net Sales and Segment Income**
  - FY 2014: 0.7
  - FY 2015: 0.9
  - FY 2016: 3.0

- **Orders Received and Order Backlog**
  - FY 2014: 9.8
  - FY 2015: 13.6
  - FY 2016: 17.8

- **Segment Income**
  - FY 2014: 11.2
  - FY 2015: 9.5
  - FY 2016: 13.8

- **Net Sales**
  - FY 2014: 0.7
  - FY 2015: 0.9
  - FY 2016: 3.0

- **Orders Received**
  - FY 2014: 9.8
  - FY 2015: 13.6
  - FY 2016: 17.8

- **Order Backlog**
  - FY 2014: 0.9
  - FY 2015: 5.1
  - FY 2016: 9.1

- **New types of complex ticket machine contributed significantly to earnings.**

  ⇒ Also received new order in FY2017.
1-7. Consolidated Financial Position

Measures for restructuring the production system made progress.

3. Current Status of the Medium-term Management Plan: “NEXT 100: Beyond 100 years, Ver. 2”
Growth in China will drive market expansion. The ASEAN and India market is projected to expand gradually.

Trends of vehicle stock globally (estimates)

- 1998: 156,000 vehicles
- 2016: 202,000 vehicles
- 2040: 300,000 vehicles
3-1. Strengthening International Competitiveness
(Transportation Systems)

Make efforts to expand the subway business in China focusing on Beijing and Chengdu.

Vehicle stock by city (Present estimate; dotted line indicates forecast)

- Beijing
- Shanghai
- Guangzhou
- Chengdu
- Nanjing
- Chongqing
- Hangzhou
- Wuhan
- Tianjin
- Xian
- Ningbo
- Shenzhen
- Average of other 26 cities

- Captured demand for providing maintenance services for electrical equipment of subway vehicles in Beijing.
- Captured growing demand for the production of pantographs in Chengdu.
Captured business opportunities by adapting to changes in the Chinese subway market.

Beijing Jingche Shuangyang Traction System began providing maintenance services for electrical equipment of subway vehicles on a full-scale basis. Also eyeing the possibility of business expansion by switching to local production of pantographs.
Examine approaches to India and ASEAN region by looking into market trends and player’s moves, and reviewing the Company’s own resources.

### Outlook for India and ASEAN region ...

The market is projected to grow gradually.

#### Strengthening International Competitiveness (Transportation Systems)

<table>
<thead>
<tr>
<th></th>

<td>70 million-population cities and 80 cities with a population of half a million</td>
<td>25 cities with a population of one million</td>
</tr>
<tr>
<td>Market trends</td>
<td>About 15 urban railways High-speed railway project on the west coast of India</td>
<td>About 20 urban railways High-speed railway projects in Indonesia and Thailand</td>
</tr>
</tbody>
</table>

[Map of India and ASEAN region]
Adapted to changes in order-taking structures for Asia. Making efforts to further expand orders by centralizing business locations and functions in Shiga Ryuo Works.

3-1. Strengthening International Competitiveness (Industrial Systems)

Promoted capturing demand for power generators (biomass engine generators, etc.) in East Asia.

Developed new types of inverter, which are in strong demand in Asia.

Strengthened approaches to Tier 1 and 2 suppliers, mainly in Korea and China.
3-2. Restructuring Production System

Started construction of Shiga Ryuo Works, with completion scheduled for January 2018 and full-scale operation for June 2018.

Concept of Shiga Ryuo Works

1) Overall concept
   • Enhance development capabilities and expand business sectors.
     ⇒ Expand net sales
   • Centralize business locations and restructure production lines
     ⇒ Achieve a 30% increase in production efficiency.

2) Concept of enhancing product appeal
   • Motors: Expand capacity/range
     Low-inertia high-speed rotation
   • Inverters: Develop new types of inverter for Asia
   • Power generators: Improve added value including the Company’s own testing equipment.
   • Testing equipment: Strengthen development capabilities and expand business sectors.
3-2. Restructuring Production System

The new plant reached the mid-stage of construction process. New mission-critical system started operation. Restructuring of production system will be completed upon increasing the production capacity for transportation systems by restructuring the Yokohama Works.

<table>

- **Shiga Ryuo Works**
  - Start of construction
  - Completion of construction
  - Partial-capacity operation
  - Full-capacity operation

- **Restructuring of Yokohama Works**
  - Start of restructuring
  - Start of full-fledged restructuring

- **New mission-critical system**
  - Start of operation

Current status of construction of Shiga Ryuo Works at the end of June
3-3. Establishing New Businesses and Technologies (Transportation Systems)

Added inverters based on SiC devices to the product lineup in response to needs for space and energy savings.

Our first SiC device was adopted for upgrading the main circuit of Hiroshima Electric Railway’s 3900 series. Delivered VVVF inverter system and contributed to space, weight, and energy savings.
Developed multifunctional testing equipment. Our new motor, which rotates at 20,000 RPM, entered the final stage of development.

- The new motor, which rotates at 20,000 RPM and supports EV/HEV testing, reached the final stage of development.
- Developed multifunctional testing equipment as measures to expand sales to Tier 1 and Tier 2 suppliers. This is the first torque converter with built-in clutch packs. (According to research conducted by the Company)
Promoting proposals for effectively using natural energy

Working to effectively use natural energy sources such as small hydro, wind, biomass, wave power, tidal power, and sunlight by leveraging the Company's long-accumulated know-how in permanent magnet synchronous generators and power system connections.

Pumped small hydroelectric power generator in Nikaho City, Akita Prefecture

Yonekurayama Solar Power Plant in Kofu City, Yamanashi Prefecture

Power conditioner

EDG permanent magnet synchronous generator (supports 10-750 kW)
3-3. Establishing New Businesses and Technologies
(Information Equipment Systems)

Received orders from Transportation Bureau of City of Yokohama in July 2016 and from Bureau of Transportation Tokyo Metropolitan Government in June 2017.

This complex ticketing system meets security certification requirements and upgrade demand of other railway business operators. We plan to promote sales of this system.

- Supports various types of ticket such as IC cards, magnetic PET tickets, magnetic tickets that come in rolls, and Edmonson-style tickets.
- Achieves about a 20% reduction in standby power consumption compared to conventional systems.
3-3. Establishing New Businesses and Technologies

Succeeded in achieving the world’s first dynamic wireless power transfer from a coil array on the ground to a moving vehicle.

Jointly developed the second system (Unit No. 2) that enables power supply to a vehicle from the road surface (announced by University of Tokyo on April 5, 2017).

Wireless in-wheel motor (Unit No.2)

Configuration of second wireless in-wheel motor system

(Academic-industrial collaboration with University of Tokyo and NSK Ltd.)
3-4. Initiatives to Address Other Issues

- Corporate Governance
- Developing Human Resources
- Handing down technologies and skills
Thank you for your interest.
